Remote Admin, Business Support & IT Helpdesk Services

Company Profile & Capability Statement

www.remotesupport.raymond-gray.org
remotesupport@raymond-gray.com · Accra, Ghana · Serving SMEs Worldwide Remotely

OVERVIEW

Raymond Gray provides reliable remote support for SMEs worldwide — spanning back-office administration, customer service operations, and IT helpdesk coverage. We help teams stay responsive to customers, keep workflows organised, resolve day-to-day technical issues, and reduce operational load through structured, SOP-driven delivery.

Operating from Accra, Ghana, we serve clients across the UK, US, and internationally, with flexible timezone coverage and a delivery model built around measurable outcomes, clear escalation paths, and consistent quality.

CORE SERVICES

Remote Admin & Business Support

- Shared inbox management & customer query handling (email/chat)
- Inbound call answering, routing, booking & message discipline (VoIP/softphone)
- Timesheets, attendance tracking & contractor chasing
- CRM updates, data entry, document preparation & reporting packs
- HR admin support (starter/leaver checklists, rota support, document packs)
- Order processing, acknowledgements & expediting support

Remote IT Helpdesk Support

- L1: Ticket intake & triage, password resets, user onboarding comms
- L2 Standard: Remote desktop, VPN/connectivity, Office 365 user admin
- L2 Advanced: Active Directory, Azure/M365 tenant, Intune/SCCM, PowerShell
- Structured escalation paths with clear handover to client technical team or MSP
- SOP-based responses with QA oversight and weekly performance reporting
- Coverage across GMT and US timezones; dedicated or shared agent models available

Customer Service & Front-Office

- Shared inbox monitoring and proactive job status updates
- Inbound call handling via VoIP extension using scripts and escalation paths
- Open order and job tracking reports on agreed cadence
- Customer query resolution and escalation routing

Operations & Workflow Coordination

- Supplier follow-up, RFQ coordination and delivery chasing
- Outside processing tracking and purchasing admin
- Timesheet exception reporting and approvals chasing
- Reporting packs and performance summaries for leadership

IT HELPDESK — SERVICE TIERS

Remote IT support is delivered by dedicated technicians matched to the skill tier your environment requires. We operate against structured SOPs with clear escalation paths, weekly reporting, and seamless handover to your in-house team or MSP where needed.

Tier	Scope covered	Typical platforms & tools
L1	Ticket intake & triage, password resets, account unlocks, user onboarding comms, basic software installs, escalation routing	*Zendesk, Freshdesk, Jira Service Desk, Teams*
L2 — Standard	All L1 scope plus: remote desktop troubleshooting, VPN & connectivity issues, Office 365 user admin (basic), printer/peripheral config, software conflict resolution	*TeamViewer, AnyDesk, M365 Admin Centre, RMM tools*
L2 — Advanced	All L2 Standard scope plus: Active Directory / Entra ID admin, Azure / M365 tenant management, endpoint management (Intune / SCCM), PowerShell scripting, escalation-to-engineer triage	*Azure AD, Intune, SCCM, PowerShell, Microsoft Defender*

DELIVERY MODEL

Engagement model	Monthly hour blocks (25 / 50 / 100 hrs) or dedicated full-time agent(s)
Structure	SOP-driven delivery with clear handovers and escalation rules
Reporting	Weekly performance summary with KPIs and continuous improvement loop
Pilot approach	2-week pilot on one bottleneck; scale to additional modules after sign-off
Assurance	NDA available; role-based access controls; QA checks and template-based responses
Timezone coverage	GMT base standard; US East Coast, full US business day, and US West Coast / PST coverage available

BEST-FIT CLIENTS

- SMEs that need overflow or dedicated cover for customer emails, calls, or IT tickets
- Businesses with recurring admin workload — invoicing support, scheduling, CRM hygiene
- Teams with timesheet/attendance friction and contractor-heavy operations
- IT-dependent businesses that need structured L1/L2 helpdesk support without the overhead of a full-time in-house team
- Organisations expanding into new markets who need remote operational support from day one

ASSURANCE & CONTROLS

- Confidentiality-first approach — NDA available on request
- Role-based access controls; secure storage and access logging where applicable
- Template-based responses and QA checks for consistent customer tone and accuracy
- Structured SOPs with clear handovers and escalation rules on every engagement
- Weekly performance reporting against agreed KPIs

EXPERIENCE PROFILE

Raymond Gray's services are backed by hands-on delivery experience in high-pressure, high-accountability manufacturing and engineering environments. Our team routinely manages customer communication, order administration, job tracking and reporting, supplier follow-ups, time/attendance coordination, and IT support workflows — using structured SOPs, templates, and escalation rules that hold up under volume.

Client	Scope delivered
Aerospace Technical Metal Finishing (Aero TMF)	Customer service delivery (shared inbox), Open Order Reports, job tracking/status reporting, customer service calls support, front-office call handling via VoIP, time & attendance monitoring.
Applied Powdercoat	Order processing support, customer queries/status updates, reporting packs, and administrative workflow coordination.
Alard Engineering	Order administration, customer communications, job tracking and status reporting, and purchasing/admin coordination as required.

C&H Machine and EDM Services	Mono Engineering	Unified Manufacturing, Inc.
Crissair Incorporated	Mooney Industries	WK Engineering International, Inc.
David Barnes Company	Performance Machine Tech. Inc.	Woodward HRT

CLIENT FEEDBACK

Aerospace Technical Metal Finishing (Aero TMF)

"Within a few weeks of contracting with Raymond Gray our clients began to commend us for quick and professional response and on-time updates. This has really improved our customer satisfaction with our brand."

April 2025

Applied Powdercoat

"There were a lot of errors by in-house staff, with little to no attention to detail, so we decided to try Raymond Gray based on a recommendation from an Aerospace industry player. We were pleasantly surprised by the accuracy, consistency and reliability of their delivery."

January 2025

Alard Engineering

"Before bringing Raymond Gray onboard, we struggled a lot with our processes. It took us a long time to do everything, and this affected our productivity, our sales and our customer relationships. It was when we began to lose work and orders from some of our most loyal customers that we decided to bring in help. Our point person from Raymond Gray was brilliant and took their time to understand and refine the system. We went from a week of trying to locate a customer order to same-day updates consistently — this significantly improved our sales and customer experience."
